

Rose Protection

Dual Purpose Spray that Stops Deer and Insects from damaging Roses

Bobbex Rose is an all-natural, dual purpose spray repellent that stops Deer and Insects from feeding on and damaging roses.

Effective Rose Protection Formulated to Work Better!

Bobbex Rose is a blend of 100% natural and safe ingredients that repel through taste and smell aversion. Along with deer, Bobbex Rose deters common rose-destructive insects, including common aphids, mites, Japanese beetles, leafhoppers, greenflies and sawflies.

Bobbex Rose is GOOD for Roses—and Safe for the Environment!

Bobbex Rose provides a number of benefits beyond repelling pests. The 100% organic ingredients in Bobbex Rose make the formula beneficial to Rose development, and safe for even the most sensitive vegetation. Bobbex Rose also reduces the severity of “black spot” and powdery mildew on roses (and other flowers). Finally, Bobbex Rose protects Roses by improving a rose plant’s ability to retain moisture during dry periods that include drought, cold blustery weather, late springs, and early frosts.

Bobbex Rose is also environmentally-friendly, completely harmless to humans, and safe for all wildlife, pets, birds and aquatic creatures. The need for additional insecticides, pesticides and fungicides is reduced or eliminated, so roses survive and thrive in a healthier environment thanks to the natural protection provided from Bobbex Rose!

Fast & Easy-To-Apply—and Long Lasting!

Bobbex Rose is available as both a Ready-to-Dilute Concentrate and Ready-to-Use spray that will not burn Roses plant leaves. Once applied, it dries clear and WILL NOT WASH OFF in rain, hosing, or irrigation—staying effective for several weeks or more on depending on the rate of new growth.
